

Accessories List

Lift Model: Blue Mobile Lift

I. Main Components

Base

- Equipped with four wheels for moving and supporting the entire lift.
- Printed with an "HC" logo and some indistinct text on a white background.

Telescopic Platform

- The platform has two layers, with a door on the upper layer and none on the lower layer.
- The platform is used to carry workers or equipment and provides the ability to reach different heights.

Lifting Mechanism

- Located at the top of the lift, used to raise or lower the platform.
- The specific type and specifications of the lifting mechanism depend on the model of the lift.

Control Handle

- A black handle located at the bottom of the lift, used to control the lifting, stopping, and other actions of the platform.
- The position and quantity of the handle may vary depending on the model of the lift.

II. Other Accessories

Safety Devices: May include guardrails, anti-drop devices, emergency stop buttons, etc., to ensure the safety of the lift during use.

Power Supply: Depending on the power type of the lift, it may require a battery or external power supply.

Indicator Lights or Display Screen: Used to display the status, battery level, faults, and other information of the lift.

Toolbox: May include maintenance tools and spare parts for the daily maintenance and emergency repairs of the lift.
